Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and it is unclear what structures and/or structural relationships are being claimed by the narrative and/or functional language, it in the article claims as recited.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-10 and 12 (as best understood) are rejected under 35 U.S.C. 102(b) as being anticipated by Matsushima (4,060114).

Matsushima discloses all of the limitations of claim 1 (as best understood), i.e., a screw holding screwdriver having a plurality of perpendicular end edge tips (Phillips type) having a

cut out and an elastic piece inserted in a guide passage for holding screws.

Wherein the screwdriver includes a sleeve (28) and the groove has a dimension longer than a thickness of the blade; the elastic portion being bent; the groove is offset circumferentially and an end of the elastic portion being anchored in the groove; the tip of the elastic portion being offset radially (e.g., Figs. 4, 5 and 10).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 11 (as best understood) is rejected under 35 U.S.C. 103(a) as being unpatentable over Matsushima in view of Desbarats (3,517,714).

Matsushima as applied to claim 5 above meets all of the limitations of claim 11, except for a movable sleeve (it is unclear what is meant by elastically movable, e.g., type of material forming the sleeve?). Desbarats teaches screwdrivers with a movable sleeve (19), which surrounds the workpiece. It would have been obvious to one of ordinary skill in the art, at the time the invention was made, to modify the invention of Matsushima with the movable sleeve as taught by Desbarats to secure the workpiece.

Conclusion

8. Prior art made of record and not relied upon at this time, are considered pertinent to applicant's disclosure. Snyder, Goldstein, and Osborn et al. are cited to show related inventions.
